**PAX Tools for School at Home** is designed for parents who are facilitating learning at home for their children, which has become commonplace during the pandemic. It provides parents with concrete, researched-based strategies to help their child improve study habits and outcomes when learning at home. This program is rooted in the same science as **The PAX Good Behavior Game** used in many classrooms. **The PAX Tools** strategies are fun for both children and parents – and have successful outcomes!

**PAX Tools** are a collection of science-based strategies designed to improve children's cooperation and ability to manage their own behavior. This program is funded by Licking Memorial Health Systems and supported by Mental Health & Recovery for Licking and Knox Counties and by Our Futures in Licking County.

**WE BUILD GREAT KIDS!**
